

# Ready to Clean, Ready for Healthcare

## Prevent Infection on the Front Lines

Healthcare settings are full of devices, screens and monitors, all of which can harbor bacteria that lead to infections. That's why cleaning hard surfaces in these environments is critical to controlling the spread of infection and keeping patients and staff healthier.

### Patient Health is at Stake

- Hospital-acquired infections affect 5%-10% of hospitalized patients in the U.S. per year.<sup>1</sup>
- When healthcare facilities, care teams, and individual doctors and nurses are aware of infection problems and take specific steps to prevent them, rates of some targeted healthcare-acquired infections can decrease by more than 70%.<sup>2</sup>

To learn more about Lenovo Health and our ready-to-sanitize products, contact your local Lenovo Account Representative or your local Business Partner.

## Lenovo Health Technology: Sanitization-Ready for Patient Protection

Lenovo Health products are integral to patient care. That's why our rugged, state-of-the-art devices are tested with medical wipes to achieve more effective infection prevention. While many electronic devices can be corroded by repeated cleaning, our devices stand up to the daily sanitization necessary to achieve more effective infection prevention.

Lenovo Health recommends:

- Use hydrogen peroxide or alcohol-based wipes
- Do not use bleach-based wipes
- Wipe away residual solvent

**Virox Accel Wipes**  
with 0.5% hydrogen peroxide

**PDI Germicidal Wipes**  
alcohol-based wipes

**B. Braun Meliseptol**  
alcohol-based wipes
