

ThinkVision P32p-30 Monitor

Good looks. Great performance!

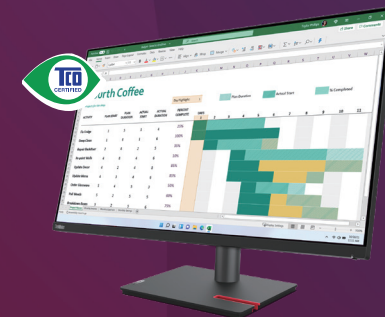

Smarter technology for all

Get a clear view of your working world!

The ThinkVision P32p-30 Monitor is designed so that you have a large screen size, packaged in a thin and sleek form factor. Its UHD resolution packs in high pixel density that brings all your documents and meetings to life with splendid detail and clarity. A 31.5-inch screen gives you generous space for multitasking, letting you view 2 or even 4 windows simultaneously. But, if multitasking on one machine doesn't seem enough, the PIP feature allows you to simultaneously view content from two separate machines on a single monitor. Share your screen with your colleagues confidently as the monitor's In-Plane Switching panel affords distortion-free views across wide viewing angles. This coupled with a NearEdgeless screen gives the monitor a contemporary look while also increasing the overall screen of real estate. The ThinkVision P32p-30 Monitor now makes that possible with its Thunderbolt™ 4 port which allows you to have a clean, one cable setup, letting you display your laptop screen on the monitor and charge the laptop simultaneously. The wide color gamut coverage also makes the monitor a good option for doing some light color correction work. Additionally, daisy chaining up to two additional displays is also possible, with its Thunderbolt™ 4 out port. You can now connect a myriad of accessories to the monitor using the Thunderbolt™ 4 hub, and multiple computers or devices with the additional display in ports - 1 x HDMI 2.0 and 1 x DP 1.4. Built-in Natural Low Blue Light technology reduces harmful blue light emissions without any color distortion, ensuring that your eyes don't experience any fatigue while you work. A delight for those who do their bit for the environment, this monitor is thoughtfully packaged in green pulp packaging. Power your professional world with the ThinkVision P32p-30 Monitor that helps you see more, be more and achieve more.

Features of ThinkVision P32p-30 Monitor

Bringing visuals to life

The ThinkVision P32p-30 Monitor's 3-side NearEdgeless In-Plane Switching panel has a UHD resolution, which ensures that everything on the screen looks extremely vivid! 100% sRGB, 95% DCI-P3 color gamut, and Avg. Delta E<2 calibration together make this monitor a great choice for color grading work as well. Enjoy rich and vivid visuals on your display without any color distortion with the in-built Natural Low Blue Light technology, that ensures your eyes are always protected from excessive blue light exposure.

Packed with practicality

Connecting accessories and daisy-chaining monitors to deck out your setup has never been easier, thanks to the plethora of connectivity options available on the ThinkVision P32p-30 Monitor. Thunderbolt™ 4 port allows you to charge your laptop at up to 100W while it is connected to the display. Compatibility with the MC60 Monitor Webcam and MS30 Monitor Soundbar* gives you the flexibility to upgrade to an even better remote meeting experience. The ergonomic stand lets you lift, tilt, pivot and swivel the monitor to perfectly suit your preferred seating position.

Towards a greener planet

The ThinkVision P32p-30 Monitor comes packaged in green pulp packaging which is a small step towards a greener planet. Additionally, it is TCO Certified by the latest generation. This means that our monitor has passed all the checks which show that it is demonstrably manufactured in a socially responsible fashion, including everything from transparency to using responsibly sourced chemicals. This makes the monitor a great choice for those who prefer to make environmentally-friendly purchases.
