

IDEACENTRE AIO 5i

Made for smart multitaskers.

Multitask and stay in the zone with powerful up-to-12th Generation Intel® Core™ i7 processors and an optional 5MP AI camera that adapts to you while you work. Watch shows in smooth, crystal-clear images on an optional QHD IPS touchscreen display with 100 Hz refresh rate and on the 27" models, 100% sRGB color gamut, and listen to more resonant audio and deeper bass paired with JBL®-certified audio.

WHY YOU SHOULD BUY LENOVO IDEACENTRE AIO 5i

Crystal clarity meets ultra-smooth action

Create or watch Netflix with crystal clarity from any angle with an exceptionally high-quality QHD IPS on the 24" or 27" display featuring three thin bezels for more screen, and on the 27" models, full-color accuracy of 100% sRGB. We've also upped the refresh rate to 100 Hz and the audio to two 5W speakers certified with JBL® with patented passive radiator, so that you'll see smoother fast-moving images and hear fuller sound by three decibels louder when you game or watch the latest blockbuster.

Superior performance where you need it most

Enjoy 5MP video chat with friends, share your vacation photos, and explore all your open browser tabs all at once, with fast connectivity, thanks to the 12th Generation Intel® Core™ processor and WiFi 6. Stay in the zone when FHD gaming or video editing, as lower-priority processes run in the background without distracting performance through the optional Intel® Arc™ graphics.

An AI webcam that adapts to you

Start sessions effortlessly with facial login on the infrared camera. Whether it's dimming the screen when you look away, adjusting screen brightness to ambient lighting or responding to hand gestures, your pull-out webcam protects privacy and adapts to you as you work, video chat, or game with the optional integrated AI chip.

Work seamlessly across devices

View both the screens of your smartphone and all-in-one conveniently by docking your phone on the stand, which also serves as a Qi-certified wireless charger. Amplify the sound of your favorite music list on the all-in-one's speakers and project the screen of your mobile devices to the QHD display for higher productivity - the One Cable Link technology* lets you link the two devices via the full-functioned Type-C™ cable.

* One Cable Link is available on models with 100 Hz panel only.
