IdeaPad Slim 3x（14″,15″,11）

The smarter choice for mobility.

The IdeaPad Slim 3 Gen 11 is more than a device; it's an invitation. No asterisks, no elitist jargon, no "pay-to-play" barriers. We stripped away the premium markup, not the potential, delivering a machine that evolves with your ambition. Responsive enough to keep up, enduring enough to outlast your day, and intuitive enough to feel like an extension of you. It's the Smarter Choice for Mobility.

Step into Snapdragon

Powered by Snapdragon® C processors, IdeaPad Slim 3x keeps you unplugged, cool, quiet, and responsive all day. Fast Wi-Fi, instant wake, smooth multitasking, and smart video call features help you stay connected and look your best.

Sharper Views, Smarter Comfort

See more and scroll less on a taller 16:10 WUXGA display designed for everyday clarity. TÜV Low Blue Light software helps reduce eye strain, so you can work, stream, and study in comfort for longer.

Ready in Minutes, Lasting for Hours

Power through work, classes, or downtime with a battery that lasts. When it's time to recharge, Rapid Charge Boost adds up to two hours in just 15 minutes, keeping you ready for study sessions, projects, or entertainment without long waits.

Expand What You Can Do

Handle everyday multitasking with responsive 8GB LPDDR5X memory and 512GB SSD storage for fast file access and room for essentials. Two USB-A ports, two USB-C ports, and an SD card reader keep you connected.

[1] All battery life claims are approximate to the half hour and based on two methods of testing: MobileMark® 2030 battery life benchmark @ 250 nits brightness and continuous 1080p video playback @ 150 nits brightness on the latest update of Windows 11. Actual battery life will vary and depends on many factors such as product configuration and usage, software use, wireless functionality, power management settings, and screen brightness. The maximum capacity of the battery will decrease with time and use. Rapid Charge is only available on the 60WHr version battery.

[2] Height is calculated using T2 measurements and should be considered 'as thin as'.

[3] The actual transfer speed of the USB 3.2 will vary and, depending on many factors, such as the processing capability of host and peripheral devices, file attributes and other factors related to system configuration and your operating environments, may be slower than a speed of 10Gbit/s.
